

EMCOL

MPI Equipment

GP1 Bench Unit

- 1500 Amp AC + HWDC + MF Bench Unit
- Recirculating Ink System
- Versatile Head System
- Suitable for Aerospace & General Applications
- Can be made with cables, clamps and other attachments

The versatility of the EMCOL GP 1 makes it ideally suited to batch inspection work for Aerospace and other industries and is ideal for both training and production.

The headstocks are fully adjustable and will accept a number of attachments such as the ring clamping kit and mini heads.

Rapid loading is achievable using the spring clamping system which also allows clamp pressure to be adjusted to avoid damage to smaller delicate components.

The unit is fitted with digital meters and adjustable shot timers for both Current Flow and MF outputs.

The optional fine control unit allows for continuously adjustable output at lower current values, ideal for small components such as fasteners.

Adjustable side mounted White Light and UV lamps allow for ease of inspection and close examination.
